Inhalt/Content

Prozessautomation

Software-Defined Automation for Traditional Core Process Control – General Approach and Challenges 01
Christian Diedrich, Rafiul Islam (Otto von Guericke Universität Magdeburg, Germany)
Marwin Madsen (Karlsruher Institut für Technologie, Karlsruhe, Germany)
Lucas Vogt (Dresden University of Technology, Dresden, Germany)
Frank Maurer (Boehringer Ingelheim Corporate Center GmbH, Germany)
Timo Himmelsbach (BASF AG, Germany)

Agentic AI Architecture Concepts for the Engineering of Automation Systems 09
Marwin Madsen, Ilona Bühlmann, Fabian Pfetzinger, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)
Christian Späth, Frank Maurer (Boehringer Ingelheim, Biberach, Germany)
Jannis Doppmeier, Laurids Beckhoff (Beckhoff, Germany)
Moritz Berner, Thomas Punzenberger (COPA-DATA, Salzburg, Austria)
Lucas Vogt, Leonhard Urbas (Dresden University of Technology, Dresden, Germany)
Christian Diedrich (Otto von Guericke Universität Magdeburg, Germany)

Leveraging Operational Efficiency of Industrial Plants by Graph-Based Data and System Contextualization 19
Nada Sahlab, Mohamed Elsheikh, Mario Hoernicke (ABB AG Corporate Research Center Germany, Mannheim, Germany)

Knowledge-Graph-Based Scenario Generation for Simulation-Driven Operator Training in Process Plants 27
Leonie Schicketanz, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)
Mario Hoernicke (ABB AG Corporate Research Center Germany, Mannheim, Germany)

Integration und Koordination von AGVs und Robotern mit dem Module Type Package als Grundlage autonomer modularer Prozessanlagen 38
Antonio Nappi, Michelle Blumenstein, Andreas Stutz (Siemens AG, Karlsruhe, Deutschland)
Alexander Fay (Ruhr-Universität Bochum, Bochum, Deutschland)

LLM-Based Framework for Generation of Process Models 45
Mohamed Elsheikh, Mario Hoernicke, Nicolai Schoch (ABB AG Corporate Research Center Germany, Mannheim, Germany)

Retrieval-Augmented Generation in the Knowledge-Based Design of Complex Mechatronic Drive Systems 55
Eric L. Wagemann, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)
Benedikt Geib, Ronny Olsson, Christian Keßler (SEW-EURODRIVE GmbH & Co. KG, Bruchsal, Germany)

Intent-based Coupling of Copilot Capabilities Between Multiple Process Automation Applications 65
Michelle Blumenstein, Andreas Stutz, Antonio Nappi (Siemens AG, Karlsruhe, Germany)
Eva Stohrer (ehem. Siemens AG, Karlsruhe, Germany)

Robotics & Autonomous Systems

Smart-Factory-Demonstrator zur Bewertung adaptiver Aufgabenverteilung zwischen Mensch und Roboter 75
Dominik Hujo-Lauer, Birgit Vogel-Heuser, Dorothea Pantförder, Alessandra Albuquerque Raymundo da Silva (Technische Universität München)
Michael Spitzhirn (imk Industrial Intelligence GmbH)

Fully Offline Voice-Driven Indoor Navigation on Resource-Constrained Quadruped Robots using Edge-Based Language Processing 81
Bijay Paudel, Joachim Grimstad, Nasser Jazdi, Andrey Morozov, Michael Weyrich (Universität Stuttgart, Stuttgart, Germany)

Seamless Machine Integration in Smart Manufacturing: Utilizing OPC UA for Machinery with Skill-Based Engineering of Varying Granularity 90
Simon Jungbluth, Benjamin Blumhofer, Florian Schaan (Technologie-Initiative SmartFactory KL e.V., Kaiserslautern, Germany)
Linus Witucki, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)
Martin Ruskowski (RPTU University Kaiserslautern-Landau, Kaiserslautern, Germany)

AI, Data Science & Dataspaces

Produktionsreifer und skalierbarer On-Premises Betrieb von LLMs 100
Henrik Sebastian Steude, Igor Kvachenok, Christian Geier (prokube.ai GmbH, Hamburg)
Lukas Moddemann, Alexander Diedrich, Oliver Niggemann (Helmut-Schmidt-Universität, Hamburg)
Stephan Myschik (Universität der Bundeswehr München, Munich, Germany)

Model Transferability of Steady-State Process Models Between Different Products of a Vertical Roller Mill in the Cement Industry 109
Sven Rathgeber (Gebr. Pfeiffer SE, Kaiserslautern, Germany)
Martin Ruskowski, Pascal Rübel (DFKI, Kaiserslautern, Germany)

Generation of PLC Code using Large Language Models: A Comparative Study 117
Dominic Fröming, Lucas Vogt, Leon Urbas (Dresden University of Technology, Dresden, Germany)

AI Meets Standardization: A Hybrid Approach for Secure and Flexible Data Exchange Processes in Engineering 127
Tina Mersch, Christian Wolf, Fabian Schmid (EKS InTec GmbH, Weingarten, Germany)
Robin Gröpler, Maximilian Stang (ifak e.V., Magdeburg, Germany)

Method for Interpreting the Functionality of Predictive Artificial Neural Networks 135
Patrick Suwinski, Luca Antonia Linhsen, Annerose Braune (Dresden University of Technology, Dresden, Germany)

Multi-Agent Framework Leveraging Knowledge Graphs for Virtual Commissioning Models 144
Max Diekmann, Dirk Hartmann (Siemens AG, Munich, Germany and Technical University of Darmstadt, Germany)
Jonas Nitzler, Jan Fischer (Siemens AG, Munich, Germany)
Hans-Jürgen Pfisterer (University of Applied Sciences Osnabrück, Germany)

Scalable Estimation of Functional Reserve in Technical Building Equipment Using Data-Driven and Physics-Informed Methods 153
Nouman Ahmad, Michael Krüttgen, Jochen Müller (TH Köln, Cologne, Germany)

Radar-based modular assistance systems as foundation for AI-driven process optimization in hot strip mills 163
Samuel Rothen, Dirk Zander (ASINCO GmbH, Duisburg, Germany)
Daniel Ewen, Johannes Seitz, Bernd Kuhlenkötter (Ruhr-University-Bochum, Bochum,Germany)

Leveraging Data Warehousing for Automated Product Carbon Footprint Assessment 170
Zach Lee, Lars Spelter, Alexander Kilian, Julian Ziegler, Jörg Volke, Harald Banzhaf (MANN+HUMMEL GmbH, Ludwigsburg, Germany)

Robot-X: Building a Manufacturing Dataspace for Robot-Based Production – Experiences, Solutions, and Outlook 179
Alfred Barnard, Cheng Xin (ifak e.V., Magdeburg, Germany)
Alexander Dettman (YardStick Robotics GmbH, Bremen, Germany)

Automatische Generierung von Montageanleitungen – Ein Ansatz basierend auf Reinforcement Learning und großen Sprachmodellen 189
Niklas Widulle, Oliver Niggemann (Helmut-Schmidt-Universität/Universität der Bundeswehr Hamburg, Hamburg, Deutschland)

An Autonomous Edge Agent for the NAMUR Open Architecture: Standards-Aligned Sense–Decide–Act with a Policy-Guarded LLM Decision Layer 198
Mohammad Hadi Khori Jannatabadi, Benedikt Schmetz, Torben Miny, Tobias Kleinert (RWTH Aachen University, Aachen, Germany)

Nachhaltige Technologien

Factory-X: AAS-Based Provision of Software Updates and Product Changes Across the Product Lifecycle 208
Hesam Rezaee Ahvanouee, Alexander Fay (Ruhr University of Bochum, Bochum, Germany)
Johannes Kalhoff, Olaf Graeser (Phoenix Contact GmbH & Co. KG, Blomberg, Germany)
Thorsten Larsen-Vefring (TRUMPF Werkzeugmaschinen SE & Co. KG, Ditzingen, Germany)
Matthias Freund (Festo SE & Co. KG, Esslingen, Germany)
Achim Nübling, Jens Heidrich (SICK AG, Waldkirch, Germany)
Laura Schelenz (Forschungsvereinigung Elektrotechnik beim ZVEI e.V. (FE), Frankfurt am Main, Germany)
Stefan Schork (ZVEI e.V., Frankfurt am Main, Germany)
Jonas Bleibdrey (SCHUNK SE & Co. KG, Lauffen am Neckar, Germany)

Der Digitale Produktpass (DPP) als Werkzeug zur Transformation des Energiesystems 217
Johannes Stein, Jens Gayko, Alexander Nollau (DKE Deutsche Kommission Elektrotechnik Elektronik Informationstechnik, Offenbach am Main, Deutschland)
Christian Diedrich, Rafiul Islam (Otto-von-Guericke-Universität Magdeburg (OvGU), Magdeburg, Deutschland)
Thomas Dürr (Siemens AG, Erlangen, Deutschland)

Safety & Security

Integration of Smart Standards into Security Management via Labeled Property Graphs 230
Christian Siegwart, Felix Scherhag (ZeMA gGmbH, Saarbrücken, Germany)
Johannes Frei (t4 digital GmbH, Hergiswil, Switzerland)
Georg Frey (Universität des Saarlandes, Saarbrücken, Germany)

PGB-PKI: Eine modulinterne dezentrale PKI für die modulare Automation 238
Marwin Madsen, Mike Barth (Karlsruher Institut für Technologie, Karlsruhe, Deutschland)

Funktionale Sicherheit ohne Schnickschnack 249
Malika Mast (RAMSYS GmbH, Dorsten, Deutschland)
Gregor Schmitt-Pauksztat (Bayer AG, Leverkusen, Deutschland)

IT-/OT-Security Bedrohungsszenarien in fertigenden KMU 252
Christoph Rosenhauer, Florian Frey (Zentrum für Mechatronik und Automatisierungstechnik gGmbH, Saarbrücken, Deutschland)
Georg Frey (Universität des Saarlandes, Saarbrücken, Deutschland)

Industrielle Kommunikation

Augmented Reality and Passive Network Analysis for Monitoring Industrial Data Flows 263
Florian Frey (ZeMA gGmbH, Saarbrücken, Germany)
Georg Frey (Universität des Saarlandes, Saarbrücken, Germany)

The 60 GHz Band as a Key Technology for Contactless High Speed Communication 273
Benjamin Fiene (Phoenix Contact GmbH & Co. KG, Bad Pyrmont, Germany)

Diskrete Produktion

Automatic Logic Controller Design Using Artificial Intelligence 276
Andreas Köhler, Ajay Arun Babar, Ping Zhang (University of Duisburg-Essen, Duisburg, Germany)

Integration of model based technical documentation into the engineering processes of complex production systems 286
Melanie Stolze, Christian Diedrich (Institute for Automation and Communication e.V., Magdeburg, Germany)
Mike Barth (KIT, Karlsruhe, Germany)

Insights and Lessons Learned from a Cross-Project Comparison and Modeling of Sensor-based Automated Production Systems in Metal-Forming 296
Birgit Vogel-Heuser, Josua Höfgen (Technical University of Munich, Germany)
Sebastian Baum, Michael Weyrich, Mathias Liewald (University of Stuttgart, Germany)
Agnes Koschmider (University of Bayreuth, Germany)
Markus Gardill (Brandenburg University of Technology Cottbus-Senftenberg, Germany)
Henning Peters (Fraunhofer IEM, Germany)
Lars Penter (Technical University of Dresden, Germany)

Addressing Class Imbalance in Time Series Classification for Industrial Laser Cutting 305
Johannes Steffens, Michael Heizmann (Karlsruhe Institute of Technology, Karlsruhe, Germany)

Position-Based Control Strategy for Robotic Continuous Ultrasonic Welding 311
Maryam Ahanpanjeh, Marc Fette, Jens. P. Wulfsberg (Helmut Schmidt University, Hamburg, Germany)
Alexander Fay (Ruhr University, Bochum, Germany)

Skills & Methods

Analysis of Quality Features for Maintenance Instructions and Deduction of an Assessment Scheme for their Formats and Content 319
Johannes H. Diedrich (Synostik GmbH, Oebisfelde, Germany)
Svitlana Tetora, Christoph Lerez, Matthias Hackert-Oschätzchen (Otto von Guericke University, Magdeburg, Germany)

Model-based Predictive Maintenance for the Digital Factory 328
Michael Zeise, Martin Wollschlaeger (TU Dresden, Dresden, Germany)

Verwaltungsschale / Digital Twin

Digital Twins for Sustainability in the Process Industry – From AAS Modelling to Online-Optimisation 336
Rosario Othen, Florian Pohlmeyer, Christian Möbitz, Thomas Gries (RWTH Aachen, Aachen, Germany)
Jan Schlake, Andreas Zehnpfund, Nada Sahlab, Marco Lauricella, Chen Song (ABB AG, Mannheim, Germany)
Siegfried Graser, Andreas Schmeiser (J. M. Voith SE & Co. KG, Heidenheim, Germany)
Gert Meinl (PTS – Institut für Fasern & Papier gGmbH, Heidenau, Germany)
Philip Kayser (Modellfabrik Papier gGmbH, Düren, Germany)

STAMODIAAS: A Stage Model for Asset Administration Shell Integration on the Shop Floor 348
Pooja Kumari Gupta, Bernd Lüdemann-Ravit (Hochschule Kempten, Sonthofen, Germany)
Alexander Schmidt (AUDI AG, Ingolstadt, Germany)
Nicolai Maisch, Sharon-Naemi Stiliadou, Samed Ajdinović, Armin Lechler, Oliver Riedel, Andreas Wortmann (University of Stuttgart, Stuttgart, Germany)

From Unstructured Engineering Data to AAS-compliant Digital Twins: AAS-Consistent Output via the Engineering Data Funnel 357
Nicolai Schoch (ABB AG Corporate Research Center, Mannheim, Germany)
Nafise Eskandani (ABB AG, Mannheim, Germany)

Data Management for Digital Twin of the Assembly Process 367
Galyna Tabunshchyk, Majd Khalil, Alexander Fay (Ruhr-Universität Bochum, Germany)

Evaluating the Mapping Accuracy of Large Language Models for Automated Digital Twin Generation in Building Automation 372
Michael Krüttgen, Tariq H. Magsi, Jochen Müller (TH Köln, Cologne, Germany)

Common meta information model and web-based communication for AAS and OPC UA 382
Juilee Tikekar (IDTA, Frankfurt am Main, Germany)
Frank Volkmann, Nils Baur (Siemens AG, Nürnberg, Germany)

Poster Session

A Framework for Type-Instance Conformance in Evolving Asset Administration Shell Hierarchies 386
Marcel Auer, Moritz Dorn, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)
Hesam Rezaee Ahvanouee, Alexander Fay, (Ruhr-University Bochum, Bochum, Germany)
Michael Riester (Endress+Hauser Digital Solutions, Freiburg, Germany)

How does production data influence sustainability analysis? Sensitivity analysis of data quality throughout the product lifecycle 396
Iris Graessler, Simon Aydin, Sven Rarbach (Paderborn University, Heinz Nixdorf Institute, Paderborn, Germany)

Multi-Stage Semantic Matching for Manufacturing Capability Discovery: A Latency- and Cost-Aware Architecture for Deburring Processes 406
Thomas Bartscherer, Lejla Begic Fazlic, Matthias Vette-Steinkamp, Florian Mohr (Trier University of Applied Sciences, Environmental Campus Birkenfeld, Germany)

Large Language Model Assistant for Updating and Managing Asset Administration Shells 417
Daniel Becker, Christoph Rosenhauer (Zentrum für Mechatronik und Automatisierungstechnik gGmbH, Saarbrücken, Germany)
Georg Frey (Universität des Saarlandes, Saarbrücken, Germany)

From Brownfield Plants to Digital Twins with the AAS Generator 426
Dennis Heitkamp, Joschka Kersting, Gesa Benndorf (Fraunhofer IOSB-INA, Lemgo, Germany)

Model approach as the basis for the uniform design and operation of industrial 5G systems 431
Gustavo P. Cainelli, Sarah Willmann (Institut für Automation und Kommunikation, Magdeburg, Germany)
Lisa Underberg (Otto-von-Guericke University, Magdeburg, Germany)

Automated and Explainable System Modelling for Fault Diagnosis 440
Alexander Diedrich, Lukas Moddemann, Niklas Fin Kompe, Oliver Niggemann (Helmut-Schmidt-Universität, Hamburg, Germany)

Predictive Building Energy Management: A Case Study on Sector-Coupled Campus Networks 450
Eike Fokken, Gösta Stomberg, Matthias Schlöder, Prerna Juhlin, Charles Steinmetz, Philipp Bauer (ABB Corporate Research, Mannheim, Germany)

How Industry Implements Asset Administration Shells: An Empirical Analysis 460
Igor Garmaev, Tom Hammel, Torben Miny, Tobias Kleinert (RWTH Aachen University, Aachen, Germany)

Asset House: AAS-Based Digital Twins for Data-Driven Optimization in Energy-Intensive Infrastructures 470
Frank Hilbert, Martin Wollschlaeger (Technische Universität Dresden, Dresden, Germany)

Towards Scalable P&ID Digitization: Evaluating Open-World Object Detectors for Symbol Recognition in P&ID Digitization Workflows 479
Sebastian Palacio, Nika Strem, Mohamed Elsheikh, Thilo Braun, Nicolai Schoch (ABB AG Corporate Research Center Germany, Mannheim, Germany)

Standards as a Bridge: IEC 62443 and its relevance for cybersecurity in fire protection 486
Ulrich Rabe, Jörg Wollert (University of applied science Aachen, Aachen, Germany)

An IEC-61804 Compliant FPGA Device Architecture for Real-Time Field Device Concentrators 494
Luis Ricardo Ramirez Martin del Campo, Jörg Wollert (Institute of Applied Automation and Mechatronics, Aachen, Germany)

Sequence Planning for Modular Robot Systems with BDI-supported Large Language Models 501
Jan Eike Rösler, Linus Witucki, Mike Barth (Karlsruhe Institute of Technology, Karlsruhe, Germany)

Automated Integration of Design and Operational Data: Semantic Matching between IFC and Building Automation Systems 509
Mohammadamin Sedigh, Michael Krüttgen, Jochen Müller (TH Köln, Cologne, Germany)

Ontology-based Detection of Explicit Value Inconsistencies of Engineering Data in the Process Industry 516
Yizhi Wang, Birgit Vogel-Heuser, Joseph Alterbaum, Kathrin Land (TUM, München)
Tobias Kleinert (RWTH Aachen, Aachen)
Domagoj Vnucec, Stefan Unland (Samson AG, Frankfurt a. M.)
Ralf Brüßelbach (Sedna Automation GmbH, Dormagen)
Peter Schöler (Wacker Chemie GmbH, Burghausen)
